## Room temperature controller VER-24

- ◆ For trench heaters with fan forced convection type TURBO VKN5
- ◆ For heating/cooling CVK 2-pipes and 4-pipes units
- ◆ Output 0 ... 10V DC for fan switched electronically (ECM) 24V
- ◆ Control output 0 ... 10V or ON / OFF (24V valve)
- ◆ Heating or cooling mode
- ◆ Mode: comfortable, economical and protection
- ◆ Mode selection: Manual or weekly program
- ◆ Color touch display
- ◆ Built-in room sensor

VER-24 Room controller controls the fan and valves in order to keep the room temperature set point. Depending on the selected mode leads to increase the room temperature (heating mode) or to its reduction (cooling mode). The controller smoothly controls the fan speed (depending on the demand gradually increasing or decreasing the speed) and valve operation (depending on the demand gradually increasing or decreasing the degree of opening). In addition, the controller can regulate the work of the second valve – opening or closing it depending on demand.

VER-24 Room controller is designed for a flush mounting.
